## REPORT OF MENTOR-MENTEE

2021-22

Mentoring programme assists in identifying and meeting the needs of the students. Every student approved for study receives a mentorship from the institution. The mentor-mentee relationship began on the day of the assignment and lasts till the student has completed the course. Even after they leave the campus, the students keep in touch with their mentors. The institution's entire faculty acts as mentors. A group of students is given to each teacher for supervision. To establish a relationship with their mentees, the teachers performing as mentors meet with them for the first moment. They gather information about the mentees and keep a notebook to document their interactions with them. The mentors represent the mentees in the guidance and counselling cell meeting and are knowledgeable of their specific needs. This facilitates the institution in establishing activities and programmes that can meet the identified need.

The mentors and their mentees arrange regular meetings. During the meetings, topics such as their learning progress, involvement in programmes and activities, practicum performance, and other identified are discussed. The mentors create WhatsApp groups to enable simple communication with the mentees. The mentoring programme serves as a source of support for the students as they achieve their academic goals. The institution's mentorship programme offers a way to mentor the students as well as a way to connect with and learn about each one of them. The mentoring relationship provides a source of support for the students as they pursue their academic goals. The institution's mentorship programme gives staff members a way to get to know each student on campus and to mentor them for both academic and personal growth.
