## REMEDIAL TEACHING

The remedial teaching is done as per the performance of students in the Continuous and Comprehensive Evaluation. All levels of students are mingled together and form a group of six to seven and academic faculties will be assigned. The faculties who got the respective students will collect their data from the score sheet and conduct group meeting at regular intervals. Online and offline meeting will be done as per the need by allotted faculty members. Remedial teaching is most effective during final semester examination and Internship period. At this period the mentors help the prospective student teachers understand their goals and objectives of the importance of the professional course. They provide guidance on how to make the most of the experience, set meaningful goals, and develop a clear path for growth and learning.

### NOTICE

It is hereby informed that all faculty members are assigned as Mentors for the Mentees (students) listed against each of them for the academic session 2021-22. Concerned Mentors are informed to keep in touch for easy communication for both academic, remedial teaching and non-academic activities throughout the academic session. The list of mentors along with the time schedule for remedial teaching is attached herewith. Kindly go through it and do the academic exercise.

## REPORT OF MENTOR-MENTEE AND REMEDIAL TEACHING 2021-22

Mentoring programme assists in identifying and meeting the needs of the students. Every student approved for study receives a mentorship from the institution. The mentor-mentee relationship began on the day of the assignment and lasts till the student has completed the course. Even after they leave the campus, the students keep in touch with their mentors. The institution's entire faculty acts as mentors. A group of students is given to each teacher for supervision. To establish a relationship with their mentees, the teachers performing as mentors meet with them for the first moment. They gather information about the mentees and keep a notebook to document their interactions with them. The mentors represent the mentees in the guidance and counselling cell meeting and are knowledgeable of their specific needs. This facilitates the institution in establishing activities and programmes that can meet the identified need.

The mentors and their mentees arrange regular meetings. During the meetings, topics such as their learning progress, involvement in programmes and activities, practicum performance, and other identified are discussed. The mentors create WhatsApp groups to enable simple communication with the mentees. The mentoring programme serves as a source of support for the students as they achieve their academic goals. The institution's mentorship programme offers a way to mentor the students as well as a way to connect with and learn about each one of them. The mentoring relationship provides a source of support for the students as they pursue their academic goals. The institution's mentorship programme gives staff members a way to get to know each student on campus and to mentor them for both academic and personal growth.
